

CS310 – Project Step 4: Final Submission

Dear Students,

Congratulations on reaching the final step of your CS310 project! Throughout the semester, you have worked hard through multiple steps, overcoming challenges in Flutter development, integrating Firebase, implementing state management, and building a complete mobile application. This journey has helped you gain valuable hands-on experience in full-stack mobile app development. We truly appreciate your dedication, creativity, and teamwork so far. Now it's time to polish everything and submit your best work!

The Final Task List:

1. GitHub Repository (Primary Submission)

- ✓ Final, clean, and fully runnable code
- ✓ All features from previous steps integrated and working together
- ✓ Firebase and state management fully implemented and integrated
- ✓ Comprehensive README.md including:
 - Brief project overview and motivation
 - Step-by-step setup and run instructions (e.g., Flutter version, Firebase config, flutter pub get, etc.)
 - How to run tests (flutter test)
 - Known limitations or bugs (if any)

2. Testing (Light but Required)

- ✓ At least 2 meaningful tests (unit and widget tests)
- ✓ All tests must pass successfully when running *flutter test*
- ✓ Briefly describe what each test covers in the README

3. Final Report (A PDF submission via SUCourse before the deadline)

- ✓ App overview and list of main features
- ✓ Summary of Firebase usage (authentication, database, etc.) and state management approach
- ✓ Clear individual contributions (who implemented which features/modules)
- ✓ Lessons learned from the project and teamwork
- ✓ Challenges faced and how resolved
- ✓ A link to the video recording file.

4. Project Video (Final Version)

Record a 5-minute video showcasing your application and demonstrating all the required functionalities on an emulator / simulator or a real device in your recording. You can upload the recorded file to google drive and share the link in your PDF document.

Grading Rubric (25%)

Group Grade – 15%

- App works end-to-end with all features functional (6%)
- Testing (5%)
- Overall code quality, organization, and stability (4%)

Individual Grade – 10%

- Clear and substantial individual contributions stated in report (4%)
- Evidence of contributions visible in GitHub commit history and issues (4%)
- Ability to explain your own code and contributions (2%), this may be assessed via a short viva (oral evaluation) with individual group members

Deadline: 5th January 2026 -23:59, no late submission allowed for this step.

Pls note, No extensions will be given for this final step.

Good luck with your final submission! We're excited to see your completed apps and hear about your journey. If you have questions, feel free to ask.

Best regards,
Saima GUL
